Al-Mabhouh enters the lift with a member of hotel staff. Two Mossad agents follow disguised in tennis outfits

All four take a taxi to their hote. Folliard orins at the desk clerk as she checks in. As the hours and minutes to murder tick away, she is seen flouncing around a luxury shopping mall apparently without a care in the world, and returning to the hotel laden. with carrier bags.

She even smiles flirtatiously and tosses her brown pony-tail towards her co-assassins, before she dons a wig and reappears with her hair in a thick, centreparted bob.

Throughout the afternoon, the others fly in. Technical surveillance has shown that they never made direct phone calls to one another (instead they dialled intoa communications centre based in Austria using highly encrypted cyphers.

The task of the first wave is surveillance, and they change their appearance accordingly. When next we see Kevin Daveron, for example, he, too, is wearing a thickly-quiffed wig and is completely unrecognisable from the bald, stubbled man we saw before

At 3.20pm we get the first glimpse of the victim as he goes through customs. Members of the surveillance team trail him from the airport to the Al-Bustan Rotana Hotel

I work on the VIDI-project Logics for Intelligent Interaction: Expressivity and Succinctness funded by the Netherlands Organization for Scientific Research (NWO)

The project focussus on one of the prominent themes in logic today intelligent interaction, which docurs in any social situation. There is a multibude of logical theories in this area to such an extent that for one and the same subject there is more than one approach. There is a great need to establish whether alternative approaches actually provide fundamentally different perspectives, or whether the differences are merely superficial. By focusing on the expressivity and succinctness of these log cs, possible differences in their underlying conceptual frameworks are revealed, thus advancing our understanding of these conceptual frameworks and thereby of intelligent nteraction tself
